This Open Spaces map is periodically updated to reflect selected new open space acquisitions such as county and state parks and water supply lands. Acreage summaries were calculated using GIS (Geographic Information System) and may not reflect actual deeded acreage figures. It includes 12 open B E R G E N space categories and includes many smaller properties that were not previously mapped including many parcels under 5 acres. A wide variety of sources were used to compile this information, including current aerial photography, digital tax parcels, and local recreation, land use and master plan maps. Other information sources C O U N T Yincluded municipal planning departments and consultants, municipal Conservation Advisory Committees (CAC's) ROCHELLE and the Westchester Land Trust. * Acreage for Water Supply Lands includes dry land area only. New York City Water Supply Lands acreage total (digitally calculated) in Westchester County is approximately 8,444 acres. Reservoir acreage is included with the Major Waterbodies category, which includes all interior waterbodies larger than nine acres. ** Properties classified as Farms were primarily derived from the Westchester County Agricultural District VERNON established in 2000. This map was created by the Westchester County Department of Planning's Geographic Information System (GIS) using ArcGIS 9.2. Geographic information is based on the New York State Plane Coordinate System -East Zone Grid, North American Datum 1983. The map base utilizes digital data obtained from NYSDOT and developed in-house by Westchester County. This Open Spaces Map is periodically updated to reflect selected new open space acquisitions such as county and state parks and water supply lands. The Open Spaces data layer can be viewed and downloaded in GIS format from the County's GIS website at http://giswww.westchestergov.com. Westchester gov.com WESTCHESTER COUNTY DEPARTMENT OF PLANNING
