### GIS TRAINING COURSES AND MATERIALS

The DoIT Geographic Information Systems staff created this [training site](#) to provide county staff access to a wide range of online GIS training courses and materials.

Introductory materials, training courses and YouTube videos provide an introduction to basic GIS concepts as well as show how the technology is applied in many areas of government. Training courses are grouped for Beginners, Intermediates and Developers.

Many of the courses are offered through ESRI's online training library and to get started, an employee will need to request a ArcGIS Online account from GIS staff.

With your supervisor's approval, online training accounts can be requested from Xiaobo Cui at [xxc1@westchestergov.com](mailto:xxc1@westchestergov.com).
