CYBER SECURITY TRAINING

Westchester County Information Technology Department is launching a new security training initiative. We have partnered with Wombat Security Technologies to provide educational tools to assess and improve your cyber security intelligence both at work and at home.

If you receive an e-mail notifying you that you have a cyber-security training assignment, ee ask you to comply with this request in accordance with the County's Security and Technology Use Policy. We will be following up to ensure that every employee completes assigned training.

Background
Phishing e-mails create a significant security vulnerability. Clicking on malicious links or attachments may result in the sacrifice of sensitive data or provide access to county systems by unscrupulous parties. To prevent this from happening, we provide county employees with Web-based training sessions to help avoid such attacks in the future and understand the vulnerabilities created by clicking on suspicious links in
