

Facility Legal Requirements

PRC Matrix of Procedures for Facility Licenses, Permits, Inspections and Certificates

In order to ensure the safety of PRC facilities, regular licenses, permits, inspections and certificates are required. The following procedures are to be followed regarding these requirements.

Facility Licenses, Permits, Inspections and Certificates

PRC is responsible for ensuring that its facilities and operations are safely operated for the staff and patrons that use them. Staff are responsible for ensuring that all licenses, permits, inspections and certificates are completed and records of these are kept on file. However, as laws and other circumstances may change, it is the responsibility of the facility manager to ensure that all applicable statutes are followed.
